

Fenix
LIGHTING FOR EXTREMES

TK16
V2.0

DUAL TAIL
SWITCH
TACTICAL
FLASHLIGHT

	3100 LUMENS MAXIMUM OUTPUT
	380 METERS MAXIMUM BEAM DISTANCE

Battery Replacement: The diagram shows the flashlight with the battery cover removed. The battery is inserted into the compartment, with the positive (+) terminal facing the correct direction. The cover is then closed.

Control Switch Functions: The switch has several positions and actions:

- OFF:** The flashlight is powered off.
- Release:** Pressing the switch briefly turns the flashlight on.
- Strobe:** Pressing the switch briefly turns the flashlight on in Strobe mode.
- press and hold:** Pressing and holding the switch turns the flashlight on in the selected mode.
- Tab:** A small tab on the switch can be used to toggle between modes.
- Fully press:** Pressing the switch fully turns the flashlight on in the selected mode.
- single click:** Pressing the switch once turns the flashlight on in the selected mode.
- press and hold for 0.5s:** Pressing and holding the switch for 0.5 seconds turns the flashlight on in the selected mode.

Runtime Graph: The graph shows the output in lumens over time for different modes:

- Turbo:** High output (3000 lumens) for a short duration (approx. 2.5 hours).
- High:** High output (1000 lumens) for a short duration (approx. 2.5 hours).
- Med:** Medium output (500 lumens) for a short duration (approx. 6 hours).
- Low:** Low output (250 lumens) for a short duration (approx. 8 hours).
- Eco:** Low output (100 lumens) for a long duration (approx. 20 hours).
